

Find three articles in any magazine about a topic in biology. For each article, give me the name of the author, the year it was published, the name of the article, and the name of the magazine the article was in. Also, give me a zerox copy of each article and answer the following questions (for each article):

- 1) What is the article about?
- 2) How does this article related to a particular topic you learned about in bio 1?
- 3) What interesting things did you learn from the article that you did not know before?
- 4) What did you not understand or what was not clear about the article?
