INTRODUCTION

Budget Development Using Questica Budget

Questica Budget is a web-based tool that enables many users to work together to prepare an “Operating” budget. An Operating budget includes the budget for the salaries and benefits as well as the operating costs such as supplies, services and other operating expenses, capital outlay, and other outgo. It keeps all the data in one place to avoid duplication and to ensure accuracy.

Budget Approval Process

Questica Budget users work with Organizations, each of which contain a piece of the budget. Users are assigned roles and Organization security for their areas of responsibility. The budget approval process is configured through hierarchal approval stages using the concepts of “Promotion” or “Demotion.” Promotion denotes approval to the next stage, and Demotion denotes return to the previous stage for additional changes. Users may be denied permission to make changes to budget data once the budget is promoted to the next stage. Eventually each Organization will reach a Stage where it is considered approved. These stages are Tentative and Adopted. The following illustrates Mt. SAC’s approval stages aligned to the Questica Budget:

When the budgeting work reaches the Adopted stage, this data will be copied into the next Budget year to be used as the starting point.

Purpose of this Document

This manual will provide a guided tour of how to use the Questica budget software, particularly within the Analytics and Operating menus.

What is an Organization in Questica Budget when compared with the Banner Account Structure?

It is the combination of the Mt. SAC Banner account structure Fund and Org. For example, “11000-610000” Unrestricted General Fund-Fiscal Services. Please see the following crosswalk illustration:

**MT. SAC BANNER ACCOUNT STRUCTURE
VERSUS QUESTICA ACCOUNT STRUCTURE**

The search window works a lot like a Google search. Type in words or numbers and Qestica Budget will search all the information on the Organization to find a match. Add more search terms to narrow down your search. If you enter a phrase in quotation marks, Qestica Budget will search for the phrase. For example, if you include the word "event", then only Organizations with the word "event" will display.

ALLOW POP-UPS IN CHROME FOR QUESTICA

There are functions in Questica that, when used, will need to open in a new window. One example is the creation of a change order. Questica needs to have Chrome set to allow pop-ups for this application. It is also wise to have Windows trust Questica.

Follow these instructions in Chrome to allow pop-ups from Questica:
Open Chrome and log into Questica.

Click the  icon, located to the left of Questica's URL in the address bar.

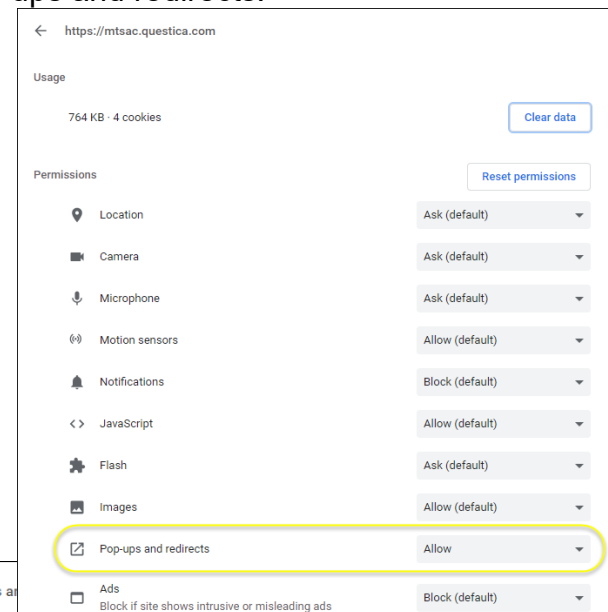

Select **Site Settings** in the drop-down that opens.

In the site settings list, find **Pop-ups and redirects**.

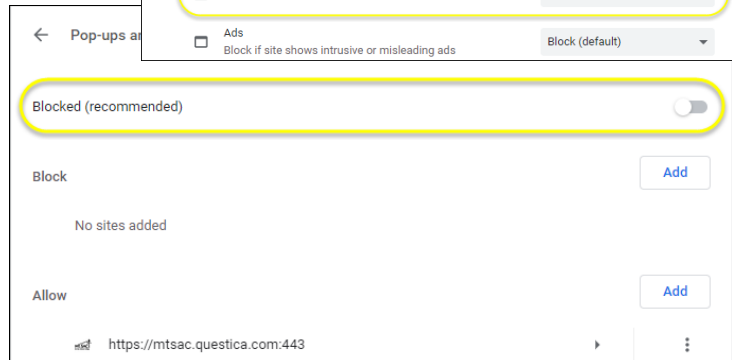

Select **Allow** in the drop-down across from Pop-ups and redirects.

Want to try it another way? If you see **"Pop up blocked"** appear in the address bar when you navigate to the site, click it. Then, click the link for the pop-up you want to see. Finally, select **"Always allow pop-ups and redirects from [site]"**, and then click Done to save the change.

Allowing pop-ups specifically for Questica will enable the site to open new windows as needed. You can continue to protect your Chrome browser from unwanted pop-ups by keeping the general pop-up setting set to **Blocked**.
